

Athlete Medical/Emergency Information Program

Warhill uses an online injury tracking software program called Sportsware Online. This program allows athletes to store medical info into a database. This database allows for quick access for the Athletic Trainer (“Doc”), allows coaches to access necessary emergency info, and allows athletes to update their personal info, insurance info, and emergency info if things happen to change. Please take the time to fill out all sections and if anything should change you may do so at any time.

It’s imperative to our athlete’s safety that this gets filled out as quickly as possible.
