

What should I do if my student has tested positive for COVID-19?

Step 1: Keep your student home. Your child may not come to school, after-school activities, or other places where they are exposed to the public.

Step 2: Inform your student's school of their health status.

Step 3: Contact tracing will start in collaboration with local and state health authorities.

Step 4: A WJCC contact tracer will call you. You will be asked to provide dates for symptoms and test results. A return to school date will be provided to you.

Step 5: Follow all isolation timelines and procedures.

Step 6: The school nurse will assess your student for symptoms upon their return to school.
